

## What is Sushi?

**SUSHI:** Sushi is rice seasoned with salt, sugar and vinegar. It comes in many different varieties. Sushi is the general word for any dish that comes with vinegared rice. Maki and nigizushi are sushi, nigiri and omusubi are not.

**SASHIMI:** Raw fish with no rice. Sashimi can also be raw meat, chicken, tofu skin or even vegetables (as long as they are served raw).

Thorough cooking or processing of foods to eliminate pathogens reduces risk of illness.

Consuming raw or undercooked meats, poultry, seafood, shellfish or eggs may increase your risk of foodborne illness
